

PRODUCT PROFILE: PHYTOPOWER

FEEL THE POWER

There's nothing in the world like PhytoPower. No other product or system in existence features a more potent blend of prebiotics, probiotics, postbiotics, digestive enzymes, and fruits and vegetables of varying colors. PhytoPower was designed and crafted to harness the power of nature to create and cultivate the perfect gut microbiome environment, and caring for the gut is the ultimate step to whole-body health and wellness.

HOW IT WORKS

Every time you drink or consume PhytoPower, you are engaging in a multi-step process to nourish, strengthen, and protect your gut microbiome.

- 1** First, over 20 billion colony-forming units (CFUs) of probiotics from the Lactobacillus and Bifidobacterium strains spread all throughout the gut to promote a healthy, active, and diverse microbiome.
- 2** Second, PhytoPower's impressive blend of prebiotics, which are found in 40 whole-food fruits and vegetables of varying colors, feed the probiotics and nourish the body with polyphenols and phytonutrients.
- 3** Finally, five unique digestive enzymes help your body break down a variety of foods, and they lay the groundwork for better probiotic activity.

HOW TO USE

PhytoPower comes in individual stick packs, which makes this awesome product versatile and easy to consume. The easiest way to drink PhytoPower is to simply mix it into a tall glass of water. A blender bottle or a water bottle will also work nicely here.

If you want to get fancy, you can blend PhytoPower into a smoothie, or even sprinkle it on yogurt, oatmeal, or any other food or beverage of your choice.

WHAT YOU CAN EXPECT

PhytoPower will help your body create the perfect microbiome environment in your gut. That's what it was designed for, and it's very good at its job. By promoting and supporting gut health, PhytoPower is also directly involved in the healthy maintenance of the following systems and functions of the body:*

DIGESTION

IMMUNE SYSTEM

NUTRIENT ABSORPTION

DETOXIFICATION

ENERGY PRODUCTION

STAMINA

CIRCULATION

SKIN HEALTH

INFLAMMATION

YOU'LL LOVE THIS

PhytoPower's exclusive blend of digestive enzymes (amylase, protease, cellulase, lactase, and lipase) helps your body break down and digest fat, protein, dairy, plant fiber and more!

BREAKING DOWN THE BLENDS

PhytoPower is made up of five distinct and uniquely beneficial blends: four fruit-and-vegetable blends that capture the unique phytonutrients, flavonoids and beneficial compounds of each color, and a super digestive microbiome blend that features digestive enzymes and probiotics.

SIMPLE, SAFE, AND ACCESSIBLE

PhytoPower's ingredients come from the garden, and were harvested and collected sustainably and naturally with no GMOs, herbicides, pesticides, artificial flavors, artificial sweeteners, or artificial colors. PhytoPower is a low-sugar product with ZERO gluten, dairy, corn, egg, or peanuts.

PhytoPower contains no added sugars, animal byproducts, lactose, sucrose, or dextrose. It's perfect for all lifestyles: vegetarian, vegan, paleo, keto, and more.

FAQs

Q: What makes PhytoPower different than other probiotic blends?

A: PhytoPower is the only product in the world that combines four unique and distinct fruit-and-vegetable blends, powerful probiotics, and a proprietary blend of digestive enzymes into one convenient dietary supplement. There is nothing in the world like PhytoPower.

Q: What are the four fruit-and-vegetable blends found in PhytoPower?

A: PhytoPower recognizes the power of plants and nature. Plant life gives life, and the colors of plants (especially fruits and vegetables) offer different health and phytonutrient benefits. PhytoPower was designed to take advantage of all of the colors of health in nature, so it contains a green blend, a red blend, a blue/purple blend, and a yellow/orange blend.

Q: What do green foods do for my body?

A: Green foods (ie. broccoli, spinach, green peppers, asparagus, etc.) offer specific antioxidant, anti-aging and anti-diabetic protection. They also promote breast health and neurological health and protect the immune system.

Q: What do red foods do for my body?

A: Red foods (ie. Cranberries, beets, pomegranates, raspberries, acerola cherries, etc.) have been known to promote heart and lung health, bladder and colon health, and neurological health. They are also known to boost cellular vitality, pulmonary health (circulation), and pancreatic health.

Q: What do blue and purple foods do for my body?

A: Blue and purple foods (i.e. Black currants, eggplants, grapes, blueberries, purple cabbage, etc.) are known for their anti-inflammatory and antioxidant properties. They also play an important part in neurological health, breast health, and skin protection.

Q: What do orange and yellow foods do for my body?

A: Orange and yellow foods (i.e. pumpkin, squash, bell peppers, bananas, etc.) are known to promote eye and skin health, cardiovascular function, and are an excellent source of vitamin A.

Q: When/how should I take the Daily 3 System?

A: You can combine the Daily 3 products together in one drink or consume them separately, whatever your preference is. You can also take them at any time of the day.

Q: Why do I need to take all three products?

A: Each of these unique products combine to form the Daily 3 System, a synergistic daily regimen that optimizes your gut health. For more detailed information on each of these products, please visit lovebiome.com/products.

FAQs

Q: I currently take a probiotic supplement. Will the LoveBiome products interfere with my current probiotic regimen?

A: The Daily 3 System can certainly be taken in conjunction with any probiotic regimen you may currently be taking. The Daily 3 System provides prebiotic, probiotic, and postbiotics which will not interfere with any other dietary supplements.

Q: Do you have caffeine in your products?

A: There is not added or naturally occurring caffeine in any of the Love Biome Daily 3 products.

Q: Is PhytoPower highly processed?

A: The ingredients in PhytoPower are not highly processed or ultra processed foods. The definition of highly processed foods is manufactured products that are designed to have a long shelf-life through the addition of preservatives, coloring, additives, emulsifiers, flavorings, processed fats and oils, low-cost chemicals, and refined carbohydrates. None of these items apply to PhytoPower. The ingredients in PhytoPower are fruits, vegetables, enzymes, and probiotics. The fruit and vegetable powders are heat treated to control microorganisms, dried in the process, and then ground into a powder. They are not highly processed based on the definition above.

Q: Can diabetics take PhytoPower?

A: PhytoPower can be consumed by diabetics with no risk. There is no sugar in PhytoPower. One serving contains 3 grams of carbohydrates, 1 gram is fiber the other 2 grams are complex carbohydrates.

Q: Are LoveBiome products soy and estrogen free?

A: Yes

Q: Is Phytopower truly gluten free and ok for people with Celiacs disease?

A: PhytoPower is Gluten free.

Q: Can pregnant women use your products?

Yes, our products are safe for pregnant women at the recommended serving sizes.

Q: Is there an age limit as to who can take the Daily 3 products?

A: At the recommended serving sizes anyone over the age of 2 can consume the Daily 3 products.

Q: Can I mix PhytoPower with hot liquids or food?

PhytoPower contains active probiotics. Mixing PhytoPower with fruit juices and carbonated beverages will not effect the efficacy of the ingredients. However, mixing PhytoPower with hot drinks over 38°C (100°F) will kill the probiotics. The probiotics, enzymes, and phytonutrients in PhytoPower, specifically, are in a stable and dormant form. They become active when there is sufficient water available for them to thrive and grow again. That is why usage instructions recommend mixing the PhytoPower powder into a liquid beverage prior to consuming.
